

NITTO

NOMAD GRAPPLER™
ALL WEATHER CROSS TERRAIN TIRE

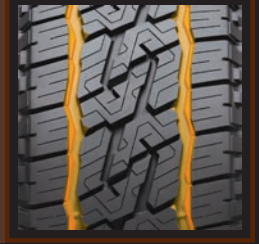

The Nitto Nomad Grappler is a versatile all weather, cross-terrain tire, and is designed to provide comfort during highway driving with added traction during those off-road adventures.

NOMAD GRAPPLER™

Double Shoulder Edge Design

- Helps stabilize the outer blocks for increased performance and reduces the chance of irregular wear.
- The zig zag design breaks up the airflow for less tire resonance for a quieter more comfortable tire.

Tapered Block Design

- Tapered blocks increase block rigidity while also reducing the chance of irregular wear on the leading edge of the block.
- Less irregular wear means less road noise.

XL - Extra Load

NOMAD GRAPPLER™

Cross Terrain Traction All Weather Security

Using a combination of features found in a highway terrain and an all-terrain to deliver a super balance for both. The tread design provides a quieter experience on paved roads while aggressive features add the extra traction needed when tackling the trails or in adverse weather.

Designed for SUVs and CUVs and some light truck the Nitto Nomad Grappler provides owners the on off-road balance they have been hoping for. In addition, two unique sidewall designs provide two alternate bold looks.

All technical information subject to change without notice.
Nitto Tire - Canada

NITTO

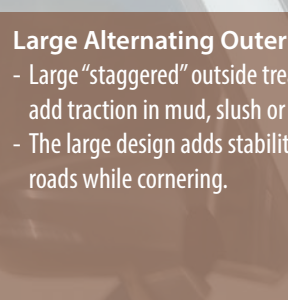

Symmetrical Tread Pattern

- An advanced computer-generated, symmetric tread design ensures dependable traction and the evacuation of rain, slush, mud, or snow.
- Multiple rotation options to reduce the chances of irregular wear for longer tread life.

Unique "S" Centre Tread Pattern

- A unique center "S" shaped tread pattern is specifically angled to add traction while accelerating, cornering, or breaking in all terrains and weather conditions.
- The large rib style design helps maintain stability at highway speeds.

Large Alternating Outer Blocks

- Large "staggered" outside tread blocks add traction in mud, slush or snow.
- The large design adds stability on paved roads while cornering.

Quiet Is Comfortable

- Offset staggered block angles increase grip and reduce road noise.
- The zig zag shape of the circumferential grooves further reduces tire resonance noise for a more comfortable ride.

3D Siping

- Varied angle 3D siping adds traction on slippery surfaces.
- The 3D design locks the sipes together for reduced block movement.

Dual Sidewall Designs

- Aggressive design improves traction in mud, sand, slush or snow.
- Two unique sidewall designs that provide the option to choose which bold style to feature.

Limited treadwear warranty - 100,000 km on millimetric sizes
- 5 year workmanship and materials.
